

Sancta Maria College is a big loving family, and the teachers take great care of us and give us a lot of warmth. The students here are also very helpful, and nice. They will take care of you and chat with you, which is different from the experience in China. Here we only got five classes a day, and the extracurricular activities are very rich. In order for our international students to better understand foreign cultures, the teacher will take us out to travel every year. We can not only experience different cultures during travel but also increase our relationship with others. Here we do not have learning pressure like in China. Although I was very worried about English at the beginning, every teacher helped me patiently, helped me solve every problem, and explained what I didn't understand. The campus in SMC is also very large, with four teaching buildings, a very large basketball court, a football field, a gymnasium, and a large lawn. Whenever I come to school, I don't feel like I was in school, it's more like I was in a big beautiful park. The school gardener dresses up the school's plants very beautifully. I like my school very much. I will graduate at the end of this year. I want to say that I will miss every teacher and all my friends from SMC very much.

Yang (Lydia) Yu – Year 13 from China
