

"I've had great experience with SMC students and teachers. They are very nice and caring for everyone. People plays a lot of sports and makes other included. There are plenty of sports to choose and all of them are really fun to try and play. The teachers are very good at teaching and not hard to understand. They care for the students. The events at SMC is very interesting. Some I've never celebrated before. It is very fun to try these new things and I hope you will try and experience them too"
